## Professional Summary

---

We are seeking a skilled Software Developer to join our development team. The candidate will work on designing, developing, and maintaining web-based applications using PHP, Laravel, JavaScript, and React.js. You will collaborate with designers, backend developers, and project managers to deliver high-quality, performance-driven solutions.

### Key Responsibilities

Develop and maintain web applications using PHP and Laravel

Build dynamic and responsive user interfaces using React.js, JavaScript, jQuery, and Tailwind CSS

Follow OOP principles and MVC architecture for clean and maintainable code

Integrate frontend interfaces with backend APIs

Optimize applications for speed, performance, and scalability

Debug, test, and troubleshoot application issues

Write clean, reusable, and well-documented code

Collaborate with cross-functional teams to understand requirements

Ensure application security and data protection best practices

Participate in code reviews and continuous improvement

### Required Skills & Technologies

#### Backend Skills

Strong knowledge of PHP

Experience with Laravel Framework

Understanding of OOP (Object-Oriented Programming)

Knowledge of MVC architecture

REST API development and integration

MySQL / Database concepts

#### Frontend Skills

Proficiency in JavaScript

Experience with React.js

Knowledge of jQuery

Strong understanding of HTML5 and CSS3

Experience using Tailwind CSS for responsive UI design

#### Additional Skills

Git / Version control

Basic knowledge of server deployment (Linux preferred)

Understanding of web security practices

Ability to write optimized and scalable code
