- **Frameworks & Libraries:** React, Django, Laravel, Express.js, Node.js
- **Development Tools:** Git, GitHub, VS Code, Postman, npm, pip
- **Methodologies:** Agile, Scrum, Test-Driven Development, Object-Oriented Programming
- **Additional Skills:** Version Control, API Integration, Code Review, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer

Progressive Graphics Company, Tilak Nagar, New Delhi

February 2024 – Present

- Developed and maintained full-stack web applications using MERN stack (MongoDB, Express.js, React, Node.js) and Laravel framework
- Built responsive frontend interfaces using React, HTML5, and CSS3, ensuring cross-browser compatibility
- Designed and implemented RESTful APIs using Node.js, Express.js, and Laravel, improving application performance by 30%
- Created attendance management system for the company using Laravel and Vite, streamlining employee tracking processes
- Integrated third-party APIs and services to enhance application functionality
- Collaborated with cross-functional teams using Agile methodologies to deliver high-quality software solutions
- Optimized database queries and application performance, resulting in 25% reduction in load times
- Utilized Git for version control and GitHub for collaborative development

Faculty

Agilo Skill India Institute, New Delhi

March 2023 – January 2024

- Conducted training sessions in computer programming and web development technologies
- Taught students programming languages including Python, Java, C, C++, and web technologies
- Developed course materials and practical exercises for skill development programs
- Guided students in building practical projects and applications
- Assisted students in understanding software development concepts and best practices

PROJECTS

SkyHighTrip

Laravel, React, Amadeus API, Hotelbeds API

March 2025 | Website: www.SkyHighTrip.com

- Developed a comprehensive travel booking platform for flights, hotels, and activities using Laravel backend and React frontend
- Integrated Amadeus API for flight booking and real-time flight availability and pricing
- Integrated Hotelbeds API for hotel reservations and room availability management
- Implemented booking system with payment integration for flights, hotels, and activities
- Built responsive user interface with React for seamless booking experience across devices

- Designed database schema to manage bookings, user data, and API responses efficiently

Attendance Management System

Laravel, Vite

Progressive Graphics | Website: attendance.Performancemarketingcompany.com

- Developed a comprehensive attendance management system for Progressive Graphics Company using Laravel framework
- Built responsive frontend using Vite for modern build tooling and optimized asset bundling
- Implemented employee attendance tracking, time-in and time-out functionality, and attendance reporting
- Designed user-friendly interface for employees and administrators to manage and view attendance records
- Created automated reports and analytics for attendance monitoring and management
- Integrated database management for storing and retrieving attendance data efficiently

Performance Marketing Company Website & CRM

Laravel, React

September 2025 | Website: www.Performancemarketingcompany.com

- Developed a complete company website and CRM system for a performance marketing company
- Built comprehensive CRM for managing clients, projects, departments, and social media schedules
- Implemented client management module with contact tracking, communication history, and client profiles
- Created project management system with task assignment, progress tracking, and project timelines
- Designed department management functionality for organizational structure and team management
- Developed social media scheduling system for planning, scheduling, and managing social media content across multiple platforms
- Built responsive website interface with modern UI/UX design principles
- Integrated database schema to efficiently manage clients, projects, departments, and social media schedules

SFB Cookies E-Commerce Website

Laravel

November 2025 | Website: www.sfbcookies.com

- Developed a comprehensive e-commerce application for SFB Cookies using Laravel framework
- Built integrated CRM system for managing orders, customers, products, and invoices
- Implemented order management system with order tracking, status updates, and order history
- Created customer management module with customer profiles, purchase history, and customer relationship tracking
- Designed product management system with inventory tracking, product catalog, and pricing management
- Developed invoice generation and management system for order processing and billing
- Built responsive e-commerce interface with shopping cart, checkout process, and payment integration
- Integrated database schema to efficiently manage orders, customers, products, and invoices

Abacus Mental Mathematics Academy

WordPress, WooCommerce

September 2025 | Website: www.ammmainda.com

- Developed a complete website for Abacus Mental Mathematics Academy using WordPress CMS
- Integrated WooCommerce plugin for e-commerce functionality, course enrollment, and online payments
- Designed user-friendly interface for course information, registration, and student portal
- Implemented product catalog for courses, books, and educational materials
- Created responsive website design optimized for all devices and screen sizes
- Configured payment gateway integration for secure online transactions
- Managed website content, updates, and maintenance using WordPress dashboard

WealthMatrixGroup

Next.js

November 2025 | Website: www.wealthmatrixgroup.com

- Developed a professional website for WealthMatrixGroup using Next.js framework
- Built responsive and SEO-optimized web application with server-side rendering capabilities
- Implemented modern UI/UX design with dynamic content management
- Created fast and efficient user interface leveraging Next.js performance optimizations
- Integrated client-side routing and optimized page loading for enhanced user experience

ExcelerateTaxAdvisory

Next.js

December 2025 | Website: www.exceleratetaxadvisory.com

- Developed a comprehensive website for ExcelerateTaxAdvisory using Next.js framework
- Built responsive web application with server-side rendering for improved SEO and performance
- Designed professional interface for tax advisory services and information
- Implemented dynamic content rendering and optimized user experience
- Created fast-loading pages with Next.js static generation and optimization features

Cashflow Summit

React

January 2026 | Website: cashflowsummit.in

- Developed a professional website for Cashflow Summit 2026 using React framework
- Built responsive web application for the cashflow summit organized by CA Jagmohan Singh
- Designed modern and engaging user interface for summit information, registration, and event details
- Implemented dynamic content rendering for summit schedule, speakers, and agenda
- Created fast-loading pages with optimized React components for enhanced user experience
- Integrated registration and contact forms for summit participation

Ambrova

Laravel

January 2026 | Website: www.ambrova.in

- Developed a comprehensive perfume e-commerce website for Ambrova using Laravel framework
- Built responsive e-commerce platform with product catalog, shopping cart, and checkout functionality
- Implemented product management system with perfume categories, inventory tracking, and pricing management
- Created customer management module with user accounts, order history, and customer profiles
- Designed intuitive user interface for browsing and purchasing perfumes with advanced filtering and search capabilities
- Integrated payment gateway for secure online transactions and order processing
- Built order management system with order tracking, status updates, and invoice generation

Asthapack

Laravel

February 2026 | Website: www.asthapack.com

- Developed a comprehensive printing services website for Asthapack using Laravel framework
- Built responsive web application for printing services with order management and quotation system
- Implemented printing service catalog with various printing options, specifications, and pricing
- Created order management system for printing jobs with file upload, order tracking, and status updates
- Designed user-friendly interface for customers to request quotes, place orders, and track printing jobs
- Integrated file management system for handling print files, artwork, and design specifications
- Built quotation and invoicing system for printing services with automated calculations

Youngsietar Website & CRM

Laravel

October 2025 | Website: youngsietar.org

- Developed a comprehensive website and CRM system for Youngsietar using Laravel framework
- Built integrated CRM for managing members, donations, and events efficiently
- Implemented member management module with member profiles, registration, and membership tracking
- Created donation management system with donation tracking, payment processing, and donor records
- Designed event management functionality for creating, scheduling, and managing events
- Built responsive website interface with modern UI/UX design for organization information and updates
- Integrated database schema to efficiently manage members, donations, events, and related data
- Developed reporting and analytics features for tracking donations, member engagement, and event participation

EDUCATION

Bachelor of Computer Applications (BCA)

DPG degree College, Gurgaon, Haryana

Graduated: 2021-2024

Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development, Software Engineering

Diploma in Information Technology

NIELIT, Delhi, Delhi

Graduated: 2020-2021
