Professional Summary

Full Stack Developer with 3+ years of hands-on experience building and maintaining custom web applications for clients.

I take projects from start to finish — understanding client needs, designing solutions, coding, deploying, and supporting post-launch.

I turn ideas into fast, secure, and scalable products using the modern JavaScript/TypeScript ecosystem (Next.js 14, React, Node.js, Prisma, Docker, and AWS).

Consistently deliver clean, fast, and secure applications on time. Ready to bring the same ownership and quality to your team.

Technical Skills

Languages & Frameworks:

JavaScript • TypeScript • React.js • Next.js 14 (App Router) • Node.js • Express • Hono

Styling & State Management:

Tailwind CSS • TanStack Query / React Query • Recoil • Zod

Backend & Databases:

Prisma ORM • PostgreSQL • MongoDB • Redis (basic)

DevOps & Cloud:

Docker • AWS (EC2, ECS, Elastic Beanstalk, S3, CloudFront) • Vercel • Cloudflare • GitHub Actions •

Turborepo / Monorepo

Security & Tools:

JWT • NextAuth • Git • Postman • VS Code • Linux basics

Professional Experience

Full Stack Developer

YakshaNexus Private Limited – AI Cybersecurity Platform

March 2025 – September 2025 | Remote

- Built and launched yakshanexus.com from scratch — real-time AI-powered phishing & website safety scanner.
- Features: Live URL scanning, port analysis, SSL checks, AI threat intelligence, subscription plans.
- Tech: React.js • TypeScript • Tailwind CSS • Node.js • Express • MongoDB • AWS • TanStack Query

Full Stack Developer

HexaTech Global (Global IT Services Company)

Freelancer

- Develop and deliver custom web applications end-to-end for Indian and international clients across industries (fintech, healthcare, manufacturing, etc.)

- Build responsive, secure, and high-performance dashboards and portals using Next.js 14, React, Node.js, TypeScript, Tailwind CSS, and PostgreSQL
- Integrate with client systems including REST APIs, and third-party tools.
- Improved page speed and performance using caching, lazy loading, and Cloudflare.
- Deploy applications on AWS and Vercel with Docker and automated CI/CD pipelines (GitHub Actions).
- Handle complete project lifecycle: client calls → requirements → development → testing → go-live → support.
- Regularly fix bugs, add new features, and optimize existing client projects.

IT -Assistant

Collegedunia.com – College Listing Company

January 2023 – June 2023

- Managed hardware/software installations, troubleshooting, and system maintenance. Assisted employees with technical issues using remote tools.

Front-End Developer

Material Library – Building Material & Service Platform

September 2022 – January 2023 | Remote

- Developed responsive and high-quality web interfaces using HTML, CSS, JavaScript and React.js, Tailwind CSS. Focused on performance, cross-device compatibility, and debugging UI issues.

Operation Executive

FARE Labs Pvt. Ltd. (NABL-Accredited Laboratory)

February 2021 – May 2022 | Gurugram

- Managed Laboratory Information Management System (LIMS) and processed 1000+ samples monthly. Performed data cleaning, validation, and reporting using Excel & Google Sheets (advanced VLOOKUP, Pivot Tables, dashboards).

Projects

🔗 Link: <https://yakshanexus.com/>

- End-to-end development of India's first AI agent for real-time phishing detection, URL scanning, and website safety checks. Features: User authentication (JWT/Google OAuth), subscription billing (Razorpay), admin dashboard, and AI threat analysis

🔗 Link: <https://trinetra-ai-ind.vercel.app/>

- Clean, responsive dashboard UI for data analytics/workflow tools using modern design principles.
- Focus: Pixel-perfect components with Tailwind CSS, React Query for state, and mobile-first responsiveness.
- Tech: Next.js 14 + TypeScript + Tailwind + Recoil.

Education

Diploma in Computer Engineering (3 Years)

Government Polytechnic Lisana, Rewari

2016 – 2019
