EDUCATION

B.TECH IN ELECTRONICS & COMMUNICATION

Deenbandhu Chhotu Ram University of Science & Technology, Murthal

2016 – 2019

DIPLOMA IN ELECTRONICS & COMMUNICATION

GBN Govt Polytechnic, Nilokheri

2014 – 2016

SKILLS

- User Experience & Design
- Front-End Development
- Back-End Development
- Software Engineering Fundamentals
- DevOps & Tools
- Mobile App Development
- Machine Learning & Data Science
- Professional & Soft Skills

SUMMARY

Full-stack developer and software engineer with 4+ years of experience in building scalable web and mobile applications. Proficient in developing RESTful APIs, front-end interfaces, and integrating machine learning models. Strong command over Python, Django, React Native, and Firebase with a proven ability to deliver production-ready solutions across domains.

EXPERIENCE SUMMARY

Full-stack web developer with over 4 years of hands-on experience in designing and building dynamic web applications, scalable backend systems, and responsive user interfaces. Proven expertise in leading CRM and ERP development projects, integrating APIs, and optimizing database performance. Adept in both front-end (React, Vue.js) and back-end (Laravel, CodeIgniter, Node.js) technologies, with additional experience in CMS platforms like WordPress. Demonstrated ability to collaborate across teams, manage technical operations, and contribute to efficient process automation in fast-paced environments.

PROJECT SUMMARY

Successfully delivered a range of full-stack web, mobile, and machine learning projects showcasing strong proficiency across diverse technologies and development domains. Built "Nidhi Khata," a secure multi-user banking web application using CodeIgniter 4, featuring real-time SMS notifications, KYC workflows, and transaction management. Led development of "Civil Association," a Laravel-Vue.js powered social platform with chat, job boards, and networking tools for civil professionals. Demonstrated mobile development capabilities through a React Native + Firebase expense tracker app, supporting real-time updates and cross-platform compatibility. Applied data science expertise to build a Stock Price Predictor using Python and scikit-learn, implementing data scraping, regression modeling, and insightful visualizations to forecast trends.

EXPERIENCE

insightsbot marketing, Delhi

Software Developer | Sept 2023– Feb 2024

- Led mobile game development with team (Betting Games) using react native.
- Developed full application in reference with LMS (Learning Management System).
- Integrated 3rd party api for video seminars and conferencing .

Vbagetech.in, Delhi

Web Developer | APRIL 2022 – July 2023

- Led full-stack development of custom CRM tools and client dashboards.
- Integrated user-facing UI with backend APIs using Laravel and Vue.js.
- Enhanced product scalability with optimized MySQL queries.

companify.in, Delhi

Web Developer | JUNE 2021 – MARCH 2022

- Developed custom ERP modules and dynamic content management systems.
- Built reusable front-end components in React and Vue.
- Maintained PHP-based admin panels with CodeIgniter.

mapzitech.in, Delhi

Web Developer Intern Oct 2020 – May 2021

- Assisted in building responsive UIs and backend APIs.
- Integrated user-facing UI with backend APIs using Laravel and Vue.js.
- Built and maintained websites for clients through various online platforms.
- Filed reports, gathered information, and performed research.
- Created and tested applications for websites.

nearbuy.com, Gurgaon

Operations Executive | July 2019 – February 2020

- Assisted in building responsive UIs and backend APIs.
- Integrated user-facing UI with backend APIs using Laravel and Vue.js.
- Built and maintained websites for clients through various online platforms.
- Filed reports, gathered information, and performed research.
- Created and tested applications for websites.

TECHNICAL SKILLS

USER EXPERIENCE & DESIGN

- Web Design Principles
- Design Thinking
- User-Centered Design (UCD)
- Wireframe & Mockup Creation (e.g., Figma, Adobe XD)
- DevOps & Tools
- Responsive & Mobile-First Design

BACK-END DEVELOPMENT

- Backend Technologies (Node.js, Django, Laravel, Express.js)
- RESTful API Development
- Database Management (MySQL, PostgreSQL, MongoDB)
- Authentication & Authorization (JWT, OAuth)
- Server-Side Rendering (SSR), MVC architecture

DEVOPS & TOOLS

- CI/CD Pipelines (GitHub Actions, Jenkins)
- Docker & Containerization
- Firebase & Serverless Architecture
- Cloud Platforms (AWS, GCP, Azure)
- API Testing (Postman, Swagger)

MACHINE LEARNING & DATA SCIENCE

- Data Analysis with Pandas, NumPy
- ML Algorithms (scikit-learn, TensorFlow, Keras)
- Data Visualization (Matplotlib, Seaborn)
- Model Deployment (Flask, FastAPI)

FRONT-END DEVELOPMENT

- HTML5, CSS3, JavaScript
- Front-End Frameworks (React, Vue, Angular)
- Tailwind CSS, Bootstrap, Chakra UI
- Cross-Browser Compatibility
- Performance Optimization

SOFTWARE ENGINEERING FUNDAMENTALS

- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- Version Control (Git, GitHub/GitLab)
- Clean Code & Code Reviews
- Testing & Debugging (Unit Tests, Integration Tests)

MOBILE APP DEVELOPMENT

- React Native (Expo & Bare)
- Native Modules Integration
- App Deployment (Google Play, App Store)
- Firebase Cloud Messaging, Real-Time Database

PROFESSIONAL & SOFT SKILLS

- Problem-Solving & Logical Thinking
- Strong Communication (Written & Verbal)
- Team Collaboration (Agile/Scrum)
- Computer Literacy (Operating Systems, IDEs)
- Project Management Tools (Jira, Trello, Asana)
- Time Management & Prioritization
- Adaptability & Continuous Learning

PROJECTS

Nidhi Khata — Banking Web App

CodeIgniter 4, MySQL, Bootstrap

A full-featured banking web application designed to support multi-user account management, including role-based access for users and admins. Developed modules for KYC verification, transaction handling (credit/debit), SMS alerts, and ledger maintenance. Ensured security practices for sensitive data and implemented session-based authentication for safer transactions.

Civil Association – Social Platform for Civil Professionals

CodeIgniter 4, MySQL, Bootstrap

A full-featured banking web application designed to support multi-user account management, including role-based access for users and admins. Developed modules for KYC verification, transaction handling (credit/debit), SMS alerts, and ledger maintenance. Ensured security practices for sensitive data and implemented session-based authentication for safer transactions.

Civil Association – Social Platform for Civil Professionals

Laravel 8, Vue.js, MySQL

Created a multi-user platform catering to students, engineers, and civil consultancy firms. Integrated chat rooms, professional networking, profile matching, job portal, and resource sharing features. Focused on real-time interactivity, modular UI components, and RESTful API integration for smooth UX.

Expense Tracker – Cross-Platform Mobile App

React Native (Expo), Firebase (Firestore, Auth), Redux

Designed and deployed a mobile-first application for managing personal finances. Core features include expense categorization, real-time syncing with Firebase, daily/monthly insights, and offline support. Firebase authentication secured user data, while Redux handled predictable state management.

Stock Price Predictor – Machine Learning Application

Python, scikit-learn, pandas, matplotlib, BeautifulSoup

Built a predictive analytics tool to forecast stock price trends using linear regression and time series analysis. Performed data scraping from financial websites, cleaned and visualized the data, and implemented ML models with performance evaluation metrics like RMSE and R^2 . Delivered insights through visual charts and model interpretability.

QR Code Generator App – Utility Web Tool

Django, HTML/CSS, qrcode, SQLite

Built a predictive analytics tool to forecast stock price trends using linear regression and time series analysis. Performed data scraping from financial websites, cleaned and visualized the data, and implemented ML models with performance evaluation metrics like RMSE and R^2 . Delivered insights through visual charts and model interpretability.

Learning Management System (LMS)

Laravel, React, MySQL

Architected an LMS platform that includes course creation, video lesson hosting, student dashboards, assignments, quizzes, and progress tracking. Admin panel includes bulk upload of content, performance analytics, and certificate generation. Employed role-based access for students, instructors, and admins.

ERP Dashboard – Business Resource Planning System

Node.js, Express, MongoDB, React

Designed and built core modules for a custom ERP system including inventory management, HR/payroll, sales & purchase, and analytics dashboard. Used JWT for secure APIs and implemented data visualizations using Chart.js. Focused on modular microservices to allow scalability and maintainability.

CMS Platform – Custom Content Management System

PHP, Laravel, CKEditor, MySQL

Created a flexible CMS for managing blogs, landing pages, and dynamic site content. Features included media uploads, rich text editing, SEO settings, and theme customization. Implemented versioning, role-based publishing workflows, and multilingual support for broader reach.
