OBJECTIVE

Detail-oriented PHP Developer with experience building scalable backend applications using PHP, Laravel, and SQL databases. Skilled in OOP-based development, REST API integration, debugging, and optimizing backend performance. Strong problem-solving ability with 3 months of real-world PHP development experience. Seeking a PHP Developer role to contribute technical skills and grow in a dynamic work environment.

Education

Degree	Institute/Board	CGPA/Percentage	Year
MCA	Galgotias University	7.59	2023-25
BCA	MDU University	62.04%	2023
Senior Secondary	CBSE	62.5%	2019
Secondary	CBSE	9.2 CGPA	2017

SKILLS

- Backend: PHP, Laravel, Core PHP, OOP
- Frontend: HTML5, CSS3, JavaScript
- Databases: MySQL, MongoDB
- Version Control: Git, GitHub
- Tools: VS Code, MySQL Workbench, phpMyAdmin, Postman
- Other Languages: Python, C, C++
- Soft Skills: Problem Solving, Adaptability, Time Management, Communication

Experience & Internships

❖ PHP Developer Intern | 3 Months

- Developed backend modules using PHP and Laravel for product-based applications.
- Created authentication systems, CRUD operations, and REST APIs.
- Improved SQL query performance and optimized database schemas.
- Fixed bugs, enhanced existing features, and contributed to clean code practices.
- Collaborated with front-end teams and used Git for version control.

❖ Google AI-ML Virtual Internship | April – June 2023

- Learned ML, Deep Learning, Model Evaluation, and Optimization techniques.
- Hands-on work with TensorFlow, Keras, NumPy, Pandas, and Scikit-Learn.

PROJECT

❖ Product Management System (Product-Based Project)

A product lifecycle management tool designed for small to medium businesses.

- Developed modules for product creation, category management, pricing updates, and status tracking.
- Implemented role-based access for Admin and Product Manager.
- Created REST APIs for product operations with seamless form validation.
- Designed optimized MySQL schema and advanced filtering options.
- Added analytics dashboard for product performance and inventory monitoring.

Technologies: PHP, Laravel, MySQL, HTML, CSS, JavaScript, Git

❖ **MultiShop – E-Commerce Web Application**

Customized and developed a fully functional e-commerce web application using the “MultiShop – Online Shop Website Template” by HTML Codex.

- Integrated the MultiShop template and converted static pages into dynamic PHP modules.
- Implemented product listing, categories, cart system, checkout flow, and user authentication.
- Added admin-side features such as product management, pricing updates, and order monitoring.
- Optimized frontend elements and ensured template compatibility with backend logic.

Technologies: PHP, Laravel, MySQL, HTML5, CSS3, JavaScript, Bootstrap

❖ **PROFESSIONAL STRENGTHS**

- Writing clean, maintainable, and secure backend code.
- Troubleshooting and resolving backend issues efficiently.
- Integrating SQL/NoSQL data storage solutions.
- Building scalable API-driven applications.
- Strong understanding of OOP and MVC architectures.
- Team collaboration with Git/SVN for version control.

❖ **CERTIFICATION**

- Full Stack Web Development – APTRON Solutions
