PROFESSIONAL SUMMARY

Available for immediate joining.

Adept at developing **scalable web applications** using **PHP** and **Laravel**. Specialized in backend logic and **MVC architecture**, with hands-on experience in **MySQL** and **API integration**. Focused on **clean coding practices** and optimizing code for performance. Committed to continuous learning and applying **advanced development concepts** in real **SaaS** projects.

EXPERIENCE

Lexi

Full Stack Developer Intern (Remote)

Jul 2025 – Aug 2025

- Designed and developed a RAG-based legal assistant using FastAPI, Python, and React, enabling document-grounded responses across **1,000+ legal documents** with significantly improved answer accuracy.
- Integrated large language models with vector-based document retrieval to **reduce irrelevant responses by ~40%**, improving reliability for legal query resolution.

PS Fin Solutions

Software Developer Intern (Remote)

Jun 2025

- Developed an airline demand insights dashboard processing **real-time and historical data across 10+ routes**, enabling data-driven forecasting and operational planning.
- Implemented backend services to aggregate, clean, and analyze **thousands of flight records daily**, improving demand **trend visibility and decision accuracy by ~35%**.

Bluestock Fintech

Software Development Engineer Intern (Remote)

Aug 2024- Oct 2024

- Developed a full-stack IPO web application and REST APIs supporting **20+ active IPO listings**, enabling seamless access for internal teams and external clients.
- Designed and implemented secure backend workflows to handle **thousands of user requests per day**, ensuring reliable data retrieval and transaction consistency.

EDUCATION

Hooghly Engineering And Technology College
Computer Science and Engineering

West Bengal
Aug 2022 - Jun 2026

PROJECTS

Membership Subscription System

Jan 2023

- Deployed a membership subscription system, **increasing user retention by 25%** through tiered plans.
- Automated backend processes using PHP and Laravel, resulting in a **30% reduction in processing time**.

Product Catalog API

Jun 2024

- Built a product catalog API that **improved search efficiency by 40%** through advanced filtering options.
- Streamlined data retrieval using MySQL, **achieving a 20% decrease in query response time**.

TECHNICAL SKILLS

Key Skills: PHP, Laravel, MySQL, React.js, JavaScript, Node.js, REST APIs, VPS, Cloud Hosting

Programming & Scripting: PHP, C++, Shell Scripting (Linux)

Frameworks & Libraries: Flutter (Cross-platform development), Redux (Advanced state management), Pandas, NumPy (Data analysis & processing), Apache Kafka (Event-driven & streaming systems)

Databases & Storage: MySQL, Firebase (Authentication, real-time data)

Cloud & Deployment: Microsoft Azure, GitHub Actions (CI/CD automation), Render (Application deployment)

Systems & Security: Linux (System-level proficiency), Cybersecurity Awareness (Secure coding, auth, data protection)

Concepts & Domains: Machine Learning Basics, RESTful & GraphQL API Design (advanced usage patterns)

Certifications & Coursework: Full Stack Development (MERN Stack), Operating Systems, Database Management Systems, Computer Networks
