

RFID Products

(Full Detailed Page Content)

IndianRFID supplies a complete range of RFID products covering tags, labels, readers, antennas, printers, and smart cards. All products are designed for high-performance applications in retail, logistics, healthcare, manufacturing, transportation, and asset management.

RFID Tags & Labels (Complete Range)

IndianRFID provides durable, high-quality RFID tags and labels suitable for almost every industry application. Each type of tag is engineered to deliver reliable performance based on environment, surface type, and operational requirement.

UHF Tags (860–960 MHz)

Used for long-range and high-speed applications such as logistics, warehousing, and retail.

Types Include:

- Jewelry RFID labels for high-value retail items
 - Apparel tags for stock management and anti-theft systems
 - Windshield RFID tags for vehicle access and tolling
 - Metal-mount hard tags for industrial and metallic surfaces
 - Pallet and carton tags for supply chain tracking
 - UHF asset labels for IT equipment, tools, and fixed assets
 - Library tags for books and archival management
-

HF Tags (13.56 MHz)

Ideal for secure identification, payments, ticketing, and access control.

Includes:

- NFC-enabled smart cards
 - HF library and media labels
 - HF wristbands for events, healthcare, and amusement parks
 - HF coin tags for industrial and equipment tracking
-

LF Tags (125 kHz)

Designed for environments where metal, water, or noise interference exists.

Includes:

- Animal ear tags for livestock management
 - LF proximity tokens for access control systems
 - LF keyfobs for staff and member identification
-

NFC Tags

Used for customer engagement, interactive marketing, and product authentication.

Applications include:

- Warranty activation
- Product detail scanning
- Loyalty programs
- Quick mobile interactions

RFID Cards & Wristbands

IndianRFID provides a wide range of secure identification cards and wristbands tailored for events, access control, hospitals, and corporate environments.

Products Include:

- PVC smart cards for identity and access systems
- HID proximity cards for high-security environments
- UHF long-range cards for vehicle gates and hands-free access
- Silicone wristbands for gyms, healthcare, and industrial use
- Disposable event wristbands for large gatherings and ticketed entry

RFID Printers

Industrial and commercial-grade RFID printers capable of encoding and printing labels, tags, and smart media.

Options Include:

- Printers compatible with Zebra, TSC, Honeywell, and other brands
- UHF EPC Gen2 encoding printers
- High-volume printers for manufacturing and logistics operations

RFID printers ensure accurate tag encoding and seamless integration with software systems.

RFID Readers & Antennas

IndianRFID supplies a diverse lineup of readers and antennas for broad industrial and commercial applications.

Fixed Readers

Multi-port readers (2-port, 4-port, 8-port) built for long-range scanning and 24/7 industrial use.

Handheld Readers

Portable smart readers with Android OS supporting UHF, HF, and NFC for field audits and inventory operations.

Antennas

Available in:

- Far-field antennas for long-distance reading
- Near-field antennas for short-range or small-tag detection
- Circular and linear polarized antennas to match exact deployment requirements
