

# AMAN PATWAL

## FRONT-END DEVELOPER

+91 9711180932 | amansinghpatwal2003@gmail.com

Frontend Developer specializing in JavaScript, React.js, Next.js, and WordPress. Demonstrated expertise in crafting high-performance, user-centric web applications with a keen eye for detail. Proven ability to lead tech initiatives and deliver scalable frontend solutions. Adept at collaborating in dynamic environments, learning quickly, and focusing on creating seamless and engaging user experiences.

### TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, Dart.
- Web Technologies: HTML-5, Tailwind CSS, React.js, Next.js, Node.js, Flutter.
- Tools & Platforms: Git, GitHub, Visual Studio Code, Android Studio, WordPress.

### WORK EXPERIENCE

#### Desire Div - Front End Developer(Intern) (Dwarka Sec-12, New Delhi)

10/2024 - 03/2025

Front-End Developer with expertise in React/Next.js. Responsible for designing and developing fully functional and responsive websites tailored to the company's branding and performance requirements. Passionate about building scalable, high-performance applications, I continually strive to enhance my technical skills and make effective contributions to development teams.

#### Company Projects:

Developed 4-5 websites for clients across various industries, leveraging technologies such as HTML, TailwindCSS, Next.js, and WordPress. Key projects include:

- **Go Delivery Group:** (godeliverygroup) is a Delhi-based platform that allows businesses to rent electric scooters. Developed 3 core modules of the web app using React.js and JavaScript (~30% contribution) and regularly interacted with the client to gather feedback and adjust features accordingly. [Live](#)
- **Bansuri Vidya Mandir:** A place where you can learn to play the bansuri (Indian bamboo flute). (Contributed 40%) to the front-end development of the Bansuri Vidya website using HTML, TailwindCSS, JavaScript, and Next.js. [Live](#)
- **Desire Div:** During my internship, I contributed significantly to revamping the company's official website with a focus on enhancing the user interface and overall user experience. I was responsible for implementing (approximately ~60%) of the front-end components, working closely with the design team to translate Figma/mockup designs into responsive, interactive webpages.
