PROFESSIONAL SUMMARY

Aspiring Cloud & DevOps Engineer with 1.8 years of experience as a No-Code Developer, delivering cross-platform business applications through ClaySys AppForms. Skilled in integrating backend systems using MS SQL Server and RESTful APIs, with a strong grounding in programming (Python, Java, PHP, C, C#), front-end technologies (HTML5, CSS3), and version control via Git and GitHub. Actively building expertise in cloud and DevOps through hands-on labs and personal initiatives involving AWS, Terraform, Docker, Jenkins, and Kubernetes. Adaptable in Agile environments, with a keen interest in Bash scripting and infrastructure automation to support scalable, cloud-native deployments.

SKILLS

Cloud & Infrastructure

- AWS Services: EC2, S3, IAM, VPC, Lambda, RDS, API Gateway, Route 53, CloudWatch, CloudFront, CloudTrail, Auto Scaling, ELB, EBS, SNS, SQS
- Tools & Concepts: AWS CLI, IAM Policies, Load Balancing, Monitoring & Alerting
- Web Servers: Nginx, Apache HTTP Server
- Security: IAM Policies, Role-based Access Control (RBAC), Basic Networking (Security Groups, Subnets)

DevOps & Automation

- Infrastructure as Code (IaC): Terraform
- CI/CD Tools: Jenkins, GitHub Actions
- Containerization & Orchestration: Docker, Kubernetes, OpenShift, Amazon EKS, Helm
- Monitoring & Logging: CloudWatch, Prometheus, Grafana

Database Management

- MS SQL Server: Stored Procedures, User Management, Backup & Restore, Permission Handling.
- Other Databases: MySQL

Programming & Scripting

- Languages: Python, C
- Scripting: Bash, Python
- Configuration Languages: YAML, JSON
- API Experience: RESTful APIs (HTTP methods: GET, POST, PUT, DELETE)

Web Technologies & Tools

- Frontend: HTML5, CSS3
- Version Control & Collaboration: Git, GitHub
- Operating Systems: Amazon Linux, Ubuntu, Windows
- Methodologies: Agile (Scrum), DevOps Practices

PROFESSIONAL EXPERIENCE

No-Code Developer | Claysys Technologies (10/2023 – 06/2025)

- Developed scalable and maintainable web and mobile applications using ClaySys AppForms, a metadata-driven low-code platform.
- Applied the version control best practices using Git and GitHub, contributing to structured release cycles and collaborative development.
- Configured advanced business logic and automated workflows using the AppForms Rules Editor, reducing manual processes and increasing efficiency.

- Integrated backend services with MS SQL Server stored procedures, managing data operations and implementing business rules.
- Created and connected RESTful APIs for secure, real-time communication between client-side interfaces and backend services.
- Implemented role-based access control and rollback features to ensure application security and maintain system integrity.
- Designed ADA-compliant user interfaces, improving accessibility and enhancing the overall user experience.
- Delivered responsive, cross-browser compatible HTML5-based designs, ensuring smooth interaction across mobile and desktop devices.
- Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, code reviews, and daily stand-ups.

Key Projects:

- **Digital Banking Platform** – Engineered a secure online banking solution that streamlined transaction workflows by **40%**, enhancing dashboard efficiency and reducing user error rates across devices.
- **Financial Advisory Tools** – Designed modular tools for financial planning that minimized manual tracking errors by **25%**, and increased client engagement through personalized insights.
- **Internal Support System** – Collaborated on the development of a helpdesk platform that boosted team responsiveness and shortened ticket resolution times by **30%**, improving customer support flow.

EDUCATION

MCA, De Paul Institute of Science and Technology, Ernakulam (11/2021 – 08/2023)

BCA, Vidya Vikas First Grade College, Mysore, Karnataka (07/2017 – 09/2020)

CERTIFICATION & COURSES

- Demystifying Networks, NPTEL (SWAYAM) (08/2023)
- AWS Cloud Computing, Course Completion Badge (07/2020)
